**Examiner's Amendment**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

(1) Cancel claims 1-16.

(2) Claim 23, line 3, after "papers," delete "and" and insert "or".

(3) Claim 26, line 2, after "particles" and before "low", delete "comprises" and insert "comprise".

(4) Claim 27, line 2, after "particles" and before "low", delete "comprises" and insert "comprise".

(5) Claim 29, line 2, after "wherein" and before "inks", delete "the".

(6) Claim 29, line 3 after "the" and before "consisting" delete "groups" and insert "group".

2. Authorization for this examiner's amendment was given in a telephone interview with Dara Onofrio on 5/21/04.

**Statement of Reasons for Allowance**

3. The present claims are allowable over the “closest” prior art Ichinose et al. (U.S. 6,550,909) for the following reasons:

Ichinose et al. disclose ink jet printing method comprising (i) printing onto a recording medium which comprises substrate coated with ink receiving layer, i.e. referred to as porous layer including inorganic pigment, and upper layer, i.e. referred to as porous layer including polymer particles, which comprises binder and polymeric particles such as polyethylene which have film forming temperature of 40-150 °C and (ii) heating the printed image to form protective coating. However, there is no disclosure in Ichinose et al. that the printed image is substantially retained within the upper layer as required in all the present claims. Ichinose et al. disclose that the pigment, i.e. printed image, is adsorbed into the upper layer while the present claims require that the printed image is substantially retained in the upper layer. As set forth in the declaration filed 6/6/03, “substantially retained in the upper protective layer” refers to ink that is completely absorbed in the surface of the material but is kept as close to the surface of the material as possible. Thus, as noted on pages 6-7 of the amendment filed 5/12/04, while Ichinose et al. disclose that the pigment is adsorbed and arranged in the vicinity of the surface (see col.6, lines 6-8 of Ichinose et al.) of the upper layer, this is in direct contrast to the present claims that require that the pigment is absorbed and is substantially retained within the upper protective layer.

Thus, it is clear that Ichinose et al. neither disclose nor suggest the present invention.

Further, applicants’ amendment filed 5/12/04 overcomes the objection of record.

In light of the above, it is clear that the rejections of record are untenable and so, the present claims are passed to issue.

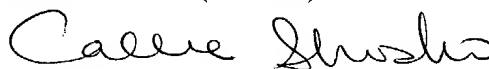

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Callie E. Shosho whose telephone number is 571-272-1123. The examiner can normally be reached on Monday-Friday (6:30-4:00) Alternate Fridays Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
